Our Company has not issued any Equity Shares for consideration other than cash during the last one year immediately preceding the date of this Letter of Offer.

SECTION III - RISK FACTORS

An investment in the equity shares involves a high degree of risk. You should carefully consider all information in this Letter of Offer, including the risks and uncertainties described below and “Financial Statements” on page 103 of this Letter of Offer, before making an investment in the Equity Shares. Additionally, the risks set out in this section may not be exhaustive and additional risks and uncertainties not presently known to us, or which we currently deem to be immaterial, may arise or may become material in the future which may impair our business, cashflows, prospects, result of operations and financial condition. In order to obtain a complete understanding about us, investors should read this section in conjunction with “Industry Overview”, “Our Business” and “Management Discussion and Analysis of Financial Condition and Results of Operations” on page 67, 81 and 106 respectively, included in this Letter of Offer. If any or a combination of the following risks or other risks that are not currently known or are now deemed immaterial actually occurs, our business, cash flows, prospects, results of operations and financial condition could be adversely affected, the trading price of the Equity Shares could decline, and investors may lose all or part of their investment. Unless specified in the relevant risk factor below, we are not in a position to quantify the financial implication of any of the risks mentioned below. In making an investment decision, prospective investors must rely on their own examinations and the terms of the Issue, including the merits and the risks involved. Prospective investors should consult their tax, financial and legal advisors about the particular consequences of investing in the Issue.

However, there are certain risk factors where the financial impact is not quantifiable and, therefore, cannot be disclosed in such risk factors. You should consult your tax, financial and legal advisors about the consequences to you of an investment in this Issue. The following factors have been considered for determining the materiality: (1) some events may not be material individually but may be found material collectively; (2) some events may have material impact qualitatively instead of quantitatively; and (3) some events may not be material at present but may have material impact in future.

This Letter of Offer also contains forward-looking statements which involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Letter of Offer. For further details, please see the chapter titled “Forward-Looking Statements” beginning on page 15.

Our financial year ends on March 31 of each year, so all references to a particular Fiscal are to the 12 months ended March 31 of that year. Unless otherwise stated or the context otherwise requires, the financial information used in this section is derived from our Audited Financial Statements and Unaudited Financial Results, which are included in “Financial Information” on page 103 of this Letter of Offer.

INTERNAL RISK FACTORS

1. Our company's reliance on sub-debt financing from several individuals poses several risk factors as there is significant Increase in Sub-Debt Raises Concerns about Company's Financial Stability and Ability to meet Debt Obligations.

Our company's sub-debt has increased significantly from ₹ 1035.70 Lakhs as of March 31, 2024, to ₹ 2006.70 Lakhs as of March 31, 2025, representing a more than three-fold increase in just one year. The company's ability to service its sub-debt obligations may be strained, given the significant increase in debt levels. The company's cash flows may be insufficient to meet the increased interest and principal payments, leading to a higher risk of default. Furthermore, the company's reliance on sub-debt financing may indicate a lack of access to more conventional and potentially less expensive forms of financing, which could be a sign of underlying financial weakness. The significant increase in sub-debt also raises concerns about the company's capital structure and its ability to manage its debt levels effectively. Additionally, the company's creditworthiness may be impacted by the rapid growth in sub-debt, potentially leading to higher borrowing costs and reduced access to credit in the future. The company's ability to meet its financial obligations, including its sub-debt obligations, is critical to its ongoing viability, and the significant increase in sub-debt highlights the need for close monitoring of the company's financial position and debt management practices.

Moreover, subordinate debt accounts for approximately 47.14% (₹2006.7 lakhs / ₹4256.96lakhs) of the total loan portfolio, which is a significant portion of the company's financial structure. Any delay in repayment or non-payment could harm the company's credibility and ability to raise future capital. In this context, the company's liquidity position could become strained, especially if the need to repay the ₹2006.7 lakhs in subordinate debt arises before sufficient funds are generated from the loan portfolio. This could lead to

7. ***We as an NBFC have to adhere to certain exposure limits and prudential norms as approved by the Board of Directors of our Company and the regulatory authorities. Any change in the regulatory regime viz net owned funds, provisioning norms, prudential norms on asset classification, income recognition, provisioning etc. may adversely affect our business, financial condition and results of operations.***

We as an NBFC company are subject to strict adherence with the exposure limits and have to comply with the prudential norms stipulated by the Reserve Bank of India while carrying on our business. Any change in these norms particularly with regard to the maintenance of net owned funds, asset classification, income recognition, provisioning etc., amongst others could have an adverse material impact on our business, financial condition and results of operations.

8. ***As an NBFC, we are subject to periodic inspections by the RBI. Non-compliance with observations made by RBI during these inspections could expose us to penalties and restrictions.***

Under section 45N of the Reserve Bank of India, 1934 ("RBI Act") we are subject to periodic inspections by the RBI to verify correctness or completeness of any statement, information or particulars furnished to the RBI for the purpose of obtaining any information or particulars which our Company has failed to furnish on being called upon to do so. While we may respond to RBI and address such observations; there can be no assurance that the RBI will not make similar or other observations in the future. If we are unable to resolve such deficiencies to RBI's satisfaction, our ability to conduct our business may be adversely affected. Imposition of any penalty or adverse findings by the RBI during the ongoing or any future inspections may have an adverse impact on our business prospects, financial condition and results of operations. NBFCs in India are subject to strict regulation and supervision by the RBI. We require certain approvals, licenses, registrations and permissions for operating our business. Such approvals, licenses, registrations and permissions must be maintained / renewed over time and we may have to comply with certain conditions in relation to these approvals. Moreover, the applicable requirements may change from time to time. We are required to obtain and maintain a license for carrying on business as an NBFC. If we fail to obtain or retain any of these approvals or licenses, or renewals thereof, in a timely manner, or at all, our business may be adversely affected. RBI has the authority to change these norms/ criteria as and when required. Inability to meet the prescribed norms/ criteria, can adversely affect the operations and profitability of our Company.

9. ***The Remuneration of our Managing Director and Whole-Time Director was recently increased through a postal ballot dated January 08, 2025. While the approval was obtained in compliance with applicable laws and corporate governance requirements, there are several risks associated with this change that could impact the company.***

The increase in the remuneration of key executives may raise concerns among shareholders, investors, and other stakeholders, particularly regarding the alignment of executive compensation with the company's financial performance. Discontent or dissatisfaction among stakeholders over perceived excessive executive pay could negatively affect investor confidence, potentially leading to a decline in share price or shareholder activism.

Changes in executive compensation are subject to scrutiny by regulatory bodies and may attract attention from governance watchdogs. The increase in remuneration could potentially be viewed as not in line with industry standards or market conditions, leading to heightened scrutiny from regulators or corporate governance institutions. This could result in reputational damage or even legal challenges if the increase is deemed excessive or not adequately justified.

An increase in executive remuneration could place additional financial strain on the company, particularly if it is not accompanied by corresponding improvements in performance or profitability. If the company's financial results do not justify the higher compensation, it may lead to concerns regarding the effective allocation of resources and the company's ability to maintain cost discipline.

The increase in the remuneration of senior management may create a disparity between executive compensation and that of other employees, potentially affecting employee morale and retention. If other employees perceive an inequitable distribution of compensation, it could result in dissatisfaction, lower productivity, or challenges in talent retention across the organization.

The recent increase in remuneration may set a precedent for future executive compensation increases, which could become a point of contention if not properly aligned with company performance and market conditions.

This could create long-term pressures on the company's financial management and complicate future negotiations with shareholders, employees, and other stakeholders.

10. Our business strategies and expansion plans may be subject to various unfamiliar risks and may not be successful.

Our business strategies include entering into new business ventures, widening our customer base by entering into new geographies and strengthening our relationships with our existing clients. For further details, see "Our Business" on page 81 of this Letter of Offer. These strategies require us to expand our operations to other geographical areas and in new industry verticals. Risks that we may face in implementing our business strategy in these markets may substantially differ from those previously experienced, thereby exposing us to risks related to new markets, industry verticals and clients. The commencement of operations beyond our current markets and industry verticals is subject to various risks including unfamiliarity with pricing dynamics, competition, service and operational issues as well as our ability to retain key management and employees. There can also be no assurance that we will not experience issues such as capital constraints, difficulties in expanding our existing operations and challenges in training an increasing number of personnel to manage and operate our expanded business, or that we will be able to successfully manage the impact of our growth on our operational and managerial resources and control systems. We may not be able to successfully manage some or all of the risks associated with such an expansion into new geographical areas and new industry verticals, which may place us at a competitive disadvantage, limit our growth opportunities and materially and adversely affect our business, results of operations and financial condition.

11. We operate in a highly competitive industry and our inability to compete effectively may adversely affect our business.

We operate in a highly competitive industry. Given the diversity of our businesses, and the products and services offered by us, we face competition from the full spectrum of public sector banks, private sector banks (including foreign banks), financial institutions, captive finance affiliates of players in various industries, small finance banks and other NBFCs who are active in SME, retail and individual lending. Many of our competitors may have greater resources than we do, may be larger in terms of business volume and may have significantly lower cost of funds compared to us. They may also have greater geographical reach, long-standing partnerships and may offer their customers other forms of financing that we may not be able to provide. Competition in our industry depends on, amongst others, the ongoing evolution of government and regulatory policies, the entry of new participants and the extent to which there is consolidation among banks and financial institutions in India. We cannot assure you that we will be able to react effectively to these or other market developments or compete effectively with new and existing players in our increasingly competitive industry and our inability to compete effectively may adversely affect our business.

12. High levels of customer defaults or delays in repayment of loans could adversely affect our business, financial condition and results of operations.

Our business involves lending money and accordingly we are subject to customer default risks including default or delay in repayment of principal and/or interest on our loans. Customers may default on their obligations to us as a result of various factors including bankruptcy, lack of liquidity, lack of business and operational failure. If borrowers fail to repay loans in a timely manner or at all, our financial condition and results of operations will be adversely impacted. Although we believe that our risk management controls are sufficient, we cannot be certain that they will continue to be sufficient or that additional risk management policies for individual borrowers will not be required. Failure to continuously monitor the loan contracts, could adversely affect our credit portfolio which could have a material and adverse effect on our results of operations and financial condition.

13. We may not be able to recover, on a timely basis or at all, the full value of collateral or amounts which are sufficient to cover the outstanding amounts due under defaulted loans.

The value of the security provided to us, may be subject to reduction in value on account of other extraneous reasons. Consequently, the realizable value of the security for the loans provided by us, when liquidated, may be lower than principal amount outstanding along with interest and other costs recoverable from such customers.

Although we believe that we generally maintain a sufficient margin in the collateral value, if we have to enforce such pledges and if at the time of such enforcement, due to adverse market conditions, the market

against the notice issued by SEBI bearing notice number EAD-2/DSR/BKM/10516/2015 dated April 15, 2015. SEBI has reached to settlement of the instant violation with the monetary settlement of Rs. 2,00,000 (Rupees Two Lakh Only).

25. *Mr. Sajeeth Mohammed Salim has been Reclassified from the promoter category to public category which may impact the market price of the shares.*

The reclassification of our promoters to public shareholders may lead to a loss of control and a change in management, which could have a material adverse effect on our business and operations. It may attract regulatory scrutiny and potentially lead to non-compliance with regulatory requirements, which could result in fines or other penalties. The reclassification of our promoters may lead to a decline in our corporate governance standards, which could negatively impact our reputation and ability to attract investors.

Mr. Sajeeth Mohammed Salim, promoter of the company has been recently classified from the Promoter category to public category which may impact the market price of the company, this event resulted in to reduction of promoter holding in the company which consequently reduce the confidence of stakeholders in the company which might affect the price traded on the stock exchange.

26. *Our Promoter and Managing Director namely Mr. Joju Madathumpady Johny have offered guarantees in relation to the inter corporate finances upto a limit to Rs. 400.00 Lakhs availed by our Company from JMJ Finance, to secure the interests of our lender.*

With respect to the sanctioned loan amounting upto a limit of ₹400.00 Lakhs from JMJ Finance Limited ("Lender"), we have secured the loan by way of creating a charge on certain assets of our Company and same was guaranteed by our promoter and managing director Mr. Joju Madathumpady Johny. In case our Company is not able to repay loans in time, the same may amount to a default under the loan documentation and the loans granted to us may be recalled with penal interest. The lender(s) may also enforce their rights over charged properties, which in turn could severely affect our business operations and financial condition. In addition to the above, our loan documentation includes certain conditions and covenants that require us to obtain consents from the lender bank prior to carrying our certain activities like change in the ownership/control/management. The lender also has the right to revoke the credit facilities at any time. Any failure to comply with any condition or covenant under loan documentation that is not waived by the lender bank may lead to the termination of our credit facilities which may adversely affect our ability to conduct our business and operations. In the event that we default in repayment of the financial facilities availed by us and any interest thereof, our lender(s) may enforce their rights over charged properties, which in turn could have significant adverse effect on our business operation and financial condition.

Further, our Promoter have offered personal and corporate guarantees in relation to the secured debt facilities availed by our Company. In case of Mr. Joju Madathumpady Johny, withdraw or terminate their guarantees or are unable to honor their respective obligations, the lender(s) for such facilities may demand substitute guarantees or immediate repayment of or acceleration of amounts outstanding under such debt facilities or terminate such facilities. In the event we are not successful in procuring guarantees to the satisfaction of the lender(s) in a timely manner or at all, we may need to repay the amounts outstanding under such loan facilities or seek alternate sources of funds, which could adversely affect our financial condition.

27. *Our company have hypothecated book debts of the company @ 200% of the loan amount against the sanctioned loan limit of Rs. 400.00 Lakhs (Rupees Four Crore Only) from JMJ Finance Limited.*

Our company has obtained sanction for Intercompany loan upto an amount of Rs. 400.00 Lakhs (Rupees Four Crore Only) from company named JMJ Finance Limited by way of hypothecation of its book debts. Company is required to create charge on the book debts which shall be registered with the Registrar of Companies, Kerala. The clause of this agreement also contains the Guarantee to be provided by the Managing Director of the company Mr. Joju Madathumpady Johny. The MD's personal guarantee may put their personal assets at risk in the event of default, which could lead to a conflict of interest. The charge on book debts may limit the company's ability to use its assets as collateral for other loans or financing arrangements. The loan from the group company may be considered a related-party transaction, which could lead to conflicts of interest and potentially unfavorable terms. The company may face difficulties in repaying the loan, which could lead to a restructuring of the loan terms or even bankruptcy

28. *Our business operates on a high volume-low margin model, which may impact our overall profitability.*

Our business operates on a high volume-low margin model, which inherently carries certain risks that may

impact our overall profitability and long-term sustainability. These risks include:

Profitability Pressure: The low-margin nature of our business necessitates maintaining high volumes of disbursements to achieve desired profit levels. A decline in loan disbursements due to changes in demand, competition, or operational inefficiencies can have a material impact on profitability.

Cost Sensitivity: Our low-margin operations, even minor increases in operating costs, such as funding costs, employee expenses, or compliance costs, can significantly erode profits and impact financial performance.

Credit risk: Our high-volume lending exposes us to increased credit risk. A deterioration in the creditworthiness of borrowers, higher defaults, or economic downturns could lead to a rise in non-performing assets (NPAs), adversely affecting profitability and asset quality.

Market Demand Fluctuations: significant changes in market demand for financial products due to economic slowdowns, shifts in consumer borrowing behavior, or increased competition can lead to lower disbursement volumes, reducing our revenue and profitability.

Cash Flow and Liquidity Management: Rapid loan disbursement cycles require effective cash flow management. Any mismatch in cash inflows and outflows, or delays in repayments, may strain liquidity and impact the company's ability to meet its financial obligations.

Scalability challenges: Scaling our loan portfolio comes with operational and risk management challenges, such as maintaining asset quality, managing credit risks, and ensuring compliance with regulatory requirements. Failure to address these challenges could limit growth and profitability.

Regulatory and Compliance Risks: As an RBI-regulated NBFC, we are subject to stringent regulatory and compliance requirements. Changes in regulations, increased compliance costs, or non-compliance with existing norms could lead to fines, penalties, or operational restrictions, affecting profitability.

Technological Adaption: The financial services industry is witnessing rapid technological advancements. To remain competitive, we must continuously invest in technology for digital lending, risk management, and operational efficiency. Failure to adapt to new technologies or disruptions in existing systems could reduce our competitiveness and profitability.

Concentration Risk: Operating on a high-volume model requires diversification across products, geographies, and customer segments. Any over-reliance on a particular product or market segment may increase vulnerability to localized risks, adversely impacting financial stability.

Economic Volatility: Broader economic factors such as inflation, interest rate fluctuations, and geopolitical instability may influence borrowing costs, consumer behavior, and overall loan demand, thereby affecting margins and profitability.

29. *Financial instability in both Indian and international financial markets could adversely affect our results of operations and financial condition.*

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy

may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

There are concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance and the trading price of the Equity Shares.

30. We require certain approvals, licenses, registrations and permits to operate our business, and failure to obtain or renew them in a timely manner or maintain the statutory and regulatory permits and approvals required to operate our business may adversely affect our operations and financial conditions. –

Our business operations depend on obtaining and maintaining various approvals, licenses, registrations, and permits. Failure to obtain or renew these in a timely manner, or to maintain compliance with statutory and regulatory requirements, may adversely affect our operations and financial condition. Without the necessary approvals and permits, we may be forced to halt or scale back operations, leading to production delays and potential loss of revenue. Non-compliance with regulatory requirements can result in fines, penalties, and legal actions, negatively impacting our profitability and overall financial health. Furthermore, failure to comply can harm our reputation, leading to a loss of customer trust, reduced sales, and difficulties in attracting or retaining customers. Navigating the complex regulatory landscape can incur significant costs in legal fees, compliance measures, and administrative efforts, straining our financial resources. Additionally, changes in laws and regulations can introduce new requirements or alter existing ones, necessitating additional approvals or modifications to current permits, which can be costly and time-consuming.

Our ability to operate smoothly also depends on the efficiency and responsiveness of government agencies in processing our applications and renewals. Delays or inefficiencies in these processes can disrupt our business activities. Certain markets may have specific regulatory requirements, and failure to meet these can limit our ability to enter or expand in these markets, affecting growth opportunities. Conditions or restrictions attached to permits and licenses can limit our operational flexibility, affecting our ability to respond to market changes or implement strategic initiatives. Furthermore, permits and licenses can be revoked if we fail to comply with regulatory standards or if there are changes in regulatory policies, leading to significant operational and financial setbacks. Regulatory approvals are also critical in mergers and acquisitions, and delays or issues in obtaining necessary approvals can hinder our strategic growth plans and affect business continuity. To mitigate these risks, it is essential to maintain a robust compliance program, actively monitor regulatory changes, and ensure timely renewals and adherence to all statutory requirements. Proactive engagement with regulatory bodies and a strong internal compliance culture are vital to safeguarding our operational and financial stability.

31. There has been an instance of delayed filing made by our Company under the SEBI Listing Regulations.

Our Company has made all requisite filings as required under the SEBI Regulations as applicable, for the last one year immediately preceding the date of filing of the Letter of Offer with BSE except for 1 (one) instance of non-compliance with requirement of disclosure by company within stipulated time under Regulation 23 of the SEBI (Listing Obligation and Disclosure Requirements) Regulations, 2015.

32. Our Company has experienced negative cash flow in the past and may continue to do so in the future, which could have a material adverse effect on our business, prospects, financial condition, cash flows and results of operations.

Our Company has experienced negative net cash flow in operating activities in the recent past, the details of which are provided below:

Particulars	Audited		
	March 31, 2025	March 31, 2024	March 31, 2023
Net Cash Flow from / (used in) Operating Activities	-933.04	-836.15	-262.83
Net Cash Flow from / (used in) Investment Activities	-51.53	-18.75	-78.54
Net Cash Flow from / (used in) Financing Activities	1171.00	736.60	299.10

Our Company is currently experiencing negative cash flow due to several key reasons. Firstly, our company generates revenue by lending money to customers and earning interest on these loans. When we disburse a large volume of loans, it results in a significant cash outflow, reducing the operating cash flow in the short term. This is a normal operational characteristic of lending institutions, especially if they are in a growth phase and expanding their loan portfolio. Additionally, while loans are disbursed immediately, the repayment (EMIs) from borrowers is received over an extended period, creating a temporary cash flow mismatch as the outflow (loan disbursement) is immediate, while inflows (EMIs) are staggered over months or years. Moreover, JMJ Fintech uses subordinated debt as debt instruments to finance loan disbursements, and as the interest costs on borrowings rise faster than loan repayments, the operating cash flow may remain negative. Finally, JMJ Fintech is aggressively expanding by issuing more loans, leading to a negative operating cash flow in the short term. However, as EMIs and interest payments start coming in, the cash flow position should improve over time.

We may incur negative cash flows in the future which may have a material adverse effect on our business, prospects, results of operations and financial condition.

33. Our financial indebtedness could adversely affect our ability to react to changes in our business, and we may be limited in our ability to use debt to fund future capital needs.

As on March 31, 2025, our Company has total outstanding borrowings (fund based as well as non-fund based) including outstanding interest of ₹ ₹4256.96 lakhs. Our substantial indebtedness could:

- require us to dedicate a substantial portion of our cash flow operations to payments in respect of our indebtedness, thereby reducing the availability of our cash flow to fund working capital, capital expenditures and other general corporate expenditures;
- increase our vulnerability to adverse general economic or industry conditions;
- limit our flexibility in planning for or reacting to, competition and/or changes in our business or our industry;
- limit our ability to borrow additional funds; and
- Place us at a competitive disadvantage relative to competitors that have less debt or greater financial resources.

We cannot assure that we will be able to generate enough cash flow from operations or that we will be able to obtain enough capital to service our debt. If we cannot obtain alternative sources of financing or our cost of borrowings become significantly more expensive, then our financial condition and results of operations will be adversely affected.

34. Our Company has not yet applied for the registration of the logo or any of the intellectual property that it uses with the registrar of Trademarks.

Our Company has not yet applied for the registration of the logo i.e.  or any of the intellectual property that it uses. Any failure to get the same registered in our name may cause any third-party claim and may lead to litigation and our business operations could be affected. Even if our trademarks are registered, we may not be able to detect any unauthorized use or infringement or take appropriate and timely steps to enforce or protect our intellectual property, nor can we provide any assurance that any unauthorized use or

46. *Our business is subject to numerous industry and market factors, particularly relating to the Banking and Finance Industry.*

Our business is subject to numerous industry and market factors. The performance of our business is directly influenced by fluctuations in the financial markets and the broader economy. Economic downturns, changes in interest rates, inflation, and shifts in market sentiment can adversely affect demand for financial products and services, reduce the availability of credit, and impact the value of our assets or investments. These factors may lead to increased loan defaults, lower consumer spending, and reduced business activity, thereby impacting our revenue and profitability.

We are exposed to credit risk from borrowers, counterparties, and other financial institutions with whom we conduct business. If these parties fail to meet their financial obligations, we may face significant financial losses. Additionally, changes in credit ratings, borrower defaults, or shifts in the creditworthiness of our clients could result in higher provisions for loan losses and a reduction in the quality of our loan portfolio.

Our ability to meet short-term financial obligations is dependent on maintaining adequate liquidity. Adverse market conditions, such as disruptions in funding sources, increased borrowing costs, or challenges in accessing capital markets, could impair our ability to meet these obligations. A reduction in liquidity could also affect our ability to fund loans or investments, resulting in decreased revenues and business operations.

As the financial industry increasingly relies on technology, we are exposed to the risk of cyberattacks, data breaches, and other information security threats. A successful cyberattack could compromise sensitive customer data, disrupt our operations, or damage our reputation. Additionally, failure to adopt and implement robust cybersecurity measures or to comply with evolving data protection regulations could result in significant financial, legal, and reputational consequences.

Changes in interest rates can significantly affect our profitability. Rising interest rates may lead to higher borrowing costs for customers, reducing loan demand, while falling interest rates may compress our net interest margins. Additionally, fluctuations in interest rates could impact the market value of fixed-income securities in our portfolio, potentially leading to losses.

The banking and finance industry is highly competitive, with numerous traditional financial institutions, fintech companies, and other market participants vying for market share. Technological advancements, new entrants into the market, and changes in consumer preferences may disrupt our existing business model and erode our competitive advantage. Failure to innovate or adapt to market changes could negatively affect our ability to attract and retain customers.

Our business is exposed to operational risks that arise from inadequate or failed internal processes, systems, human error, or external events. These risks could lead to financial losses, reputational damage, or legal liabilities. In particular, disruptions in critical business functions, such as payments processing or transaction settlements, could impact customer trust and operational efficiency.

Our business may also be impacted by geopolitical events, such as changes in government policies, trade disputes, political instability, or international conflicts. These events could lead to market volatility, supply chain disruptions, or unfavorable changes in regulations that could negatively impact our operations and financial results.

Our reputation is critical to maintaining customer trust and business relationships. Any negative publicity, whether related to regulatory investigations, legal disputes, financial performance, or customer service issues, could harm our reputation and result in customer attrition, increased scrutiny by regulators, or legal actions. A damaged reputation could also lead to a loss of business opportunities and impact our market position.

47. *Our inability to procure and/or maintain adequate insurance cover in connection with our business may adversely affect our operations and profitability.*

Our operations are subject to inherent risks and hazards which may adversely impact our profitability, such as natural disasters. Presently, we have obtained certain insurance policies such as policies to insure stock, building, furniture, fittings, from earthquake, fire, shock, terrorism, etc. There are many events that could cause significant damages to our operations, or expose us to third-party liabilities, whether or not known to us, for which we may not be insured or adequately insured, which in turn may expose us to certain risks and liabilities. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. Further, there can be no assurance that any claim under the insurance policies

acquisitions may include integration of product and service offerings, co-ordination of R&D and marketing functions and the diversion of management's time and focus from operating our business to addressing challenges pertaining to acquisition and integration.

Our failure to address these risks or other problems encountered in connection with our acquisitions and investments could result in our failure to realise the anticipated benefits of these acquisitions or investments, cause us to incur unanticipated liabilities, and harm our business generally.

RISK RELATING TO THE ISSUE AND OBJECTS OF THE ISSUE

1. *Failure to exercise or sell the Rights Entitlements will cause the Rights Entitlements to lapse without compensation and result in a dilution of Investor's shareholding.*

The Rights Entitlements that are not exercised prior to the Issue Closing Date will expire and become null and void, and Eligible Equity Shareholders will not receive any consideration in relation to the same. The proportionate ownership and voting interest in our Company of Eligible Equity Shareholders who fail (or are not able) to exercise their Rights Entitlements will be diluted. Even if you elect to sell your unexercised Rights Entitlements, the consideration you receive for them may not be sufficient to fully compensate you for the dilution of your percentage ownership of the equity share capital of our Company that may be caused as a result of the Rights Issue. Renouncees may not be able to apply in case of failure in completion of renunciation through off-market transfer in such a manner that the Rights Entitlements are credited to the demat account of the Renouncees prior to the Issue Closing Date. Further, in case, the Rights Entitlements do not get credited in time, in case of On Market Renunciation, such Renouncee will not be able to apply in this Rights Issue with respect to such Rights Entitlements. For details, see "Terms of the Issue" on page 127 of this Letter of Offer.

2. *The deployment of funds raised through this Issue shall not be subject to monitoring by any monitoring Agency and shall be purely dependent on the discretion of the management of our Company.*

Since the size of the Issue is less than ₹10,000 Lakhs, no monitoring agency is required to be appointed by our Company to oversee the deployment of funds raised through this Issue. The deployment of funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. The Board of Directors of our Company through Audit Committee will monitor the utilization of the Issue proceeds. Any inability on our part to effectively utilize the Net proceeds could adversely affect our financials.

3. *Our funding requirements and proposed deployment of the Net Proceeds are based on management estimates and have not been independently appraised and may be subject to change based on various factors, some of which are beyond our control.*

We intend to use the Net Proceeds for the purposes described in "Objects of the Issue" beginning on page 56. Our funding requirements and deployment of the Net Proceeds are based on internal management estimates based on current market conditions, and have not been appraised by any bank or financial institution or other independent agency. Further, in the absence of such independent appraisal, our funding requirements may be subject to change based on various factors which are beyond our control. We may have to revise funding requirements due to reasons which may not be within the control of our management. For further details, please see the chapter titled "Objects of the Issue" on page 56.

Accordingly, prospective investors in the Issue will need to rely upon our management's judgement with respect to the use of proceeds. If we are unable to deploy the proceeds of the Issue in a timely or an efficient manner, it may affect our business and results of operations.

4. *Any variation in the utilisation of the Net Proceeds would be subject to certain compliance requirements, including prior shareholder's approval*

We propose to utilise the Net Proceeds to repay, in full or in part, to augment the capital base and to provide funds required for increasing our operational scale with respect to our NBFC activities and also for General corporate purposes. For further details of the proposed objects of the Issue, please refer chapter titled "Objects

there is a delay in obtaining such approvals, we may not be able to credit the Rights Equity Shares allotted to the Investors to their depository participant accounts or assure ownership of such Rights Equity Shares by the Investors in any manner promptly after the Issue Closing Date. In any such event, the ownership of the Investors over Rights Equity Shares allotted to them and their ability to dispose of any such Equity Shares may be restricted. For further information on issue procedure, please see the chapter titled “*Terms of the Issue*” on page 127.

7. *Investors may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares*

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares of an Indian company are generally taxable in India. The Income Tax Act levies taxes on such long-term capital gains exceeding ₹ 1.25 lakhs arising from sale of equity shares on or after April 1, 2018, while continuing to such continuing to exempt the unrealised capital gains earned up to January 31, 2018 on such equity shares subject to specific conditions. Accordingly, you may be subject to payment of long-term capital gains tax in India, in addition to payment of a securities transaction tax (STT), on the sale of any Equity Shares held for more than 12 months at the specified rates depending on certain factors, such as whether the sale is undertaken on or off the Stock Exchange, the quantum of gains and any available treaty relief. STT will be levied on the seller and/or the purchaser of the Equity Shares and collected by a domestic stock exchange on which the Equity Shares are sold.

Further, any gain realized on the sale of listed equity shares held for a period of 12 months or less will be subject to short-term capital gains tax in India at the rate of 20% as per the Budget 2024 proposed by the Government. Capital gains arising from sale of the Equity Shares may be partially or completely exempt from taxation in India in cases where such exemption is provided under a treaty between India and the country of which the seller is a resident. Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable for tax in India as well as in their own jurisdiction on gains made upon the sale of the Equity Shares.

8. *The Issue Price of our Rights Equity Shares may not be indicative of the market price of our Equity Shares after the Issue.*

The Issue Price of Rights Equity Share may not be indicative of the market price for our Equity Shares after the Issue. The market price of the Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurance that the Investors will be able to sell their Equity Shares at or above the Issue Price. The factors that could affect our share price are:

- quarterly variations in the rate of growth of our financial indicators such as earnings per share;
- changes in revenue or earnings estimates or publication of research reports by analysts;
- speculation in the press or investment community;
- general market conditions; and,
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

In addition, the Indian equity share markets have from time-to-time experienced significant price and volume fluctuations that have affected the market prices for the securities of Indian companies. As a result, investors may experience a decrease in the value of the Equity Shares regardless of our operating performance or prospects.

EXTERNAL RISK FACTORS

1. *Conditions in the Indian securities market may affect the price or liquidity of the Equity Shares.*

Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. These exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected.

The Indian financial market and the Indian economy are influenced by economic and market conditions in other countries, particularly in emerging market in Asian countries. Financial turmoil in Asia, Europe, the United States and elsewhere in the world in recent years has affected the Indian economy. Although economic conditions are different in each country, investors' reactions to developments in one country can have an adverse effect on the securities of companies in other countries, including India. A loss in investor confidence in the financial systems of other emerging markets may cause increased volatility in Indian financial markets and, indirectly, in the Indian economy in general. Any global financial instability, including further deterioration of credit conditions in the U.S. market, could also have a negative impact on the Indian economy. Financial disruptions may occur again and could harm our results of operations and financial condition.

The Indian economy is also influenced by economic and market conditions in other countries. This includes, but is not limited to, the conditions in the United States, Europe, and certain economies in Asia. Financial turmoil in Asia and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and its business.

Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby impact the Indian economy. Financial disruptions in the future could adversely affect our business, prospects, financial condition, and results of operations. The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections.

These could include further falls in Stock Exchange indices and greater volatility of markets in general due to the increased uncertainty. These and other related events could have a significant impact on the global credit and financial markets as a whole, and could result in reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in the global credit and financial markets. There are also concerns that a tightening of monetary policy in emerging markets and some developed markets will lead to a moderation in global growth. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, have implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term impact of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have had the intended stabilizing effects. Any significant financial disruption in the future could have an adverse effect on our cost of funding, loan portfolio, business, future financial performance, and the trading price of the Equity Shares.

6. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation rates in India have been volatile in recent years, and such volatility may continue in the future. India has experienced high inflation in the recent past. Increased inflation can contribute to an increase in interest rates and increased costs to our business, including increased costs of salaries, and other expenses relevant to our business.

High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to pass on to our customers, whether entirely or in part, and the same may adversely affect our business and financial condition. In particular, we might not be able to reduce our costs or increase our rates to pass the increase in costs on to our customers. In such case, our business, results of operations, cash flows and financial condition may be adversely affected.

Further, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

7. *Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.*

Any adverse revisions to India's credit ratings international debt by international rating agencies may adversely affect our ability to raise additional overseas financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our ability to fund our growth on favourable terms or at all, and consequently adversely affect our business and financial

performance and the price of our Equity Shares.

8. *The occurrence of natural or man-made disasters could adversely affect our results of operations, cash flows and financial condition. Hostilities, terrorist attacks, civil unrest and other acts of violence could adversely affect the financial markets and our business.*

The occurrence of natural disasters, including cyclones, storms, floods, earthquakes, tsunamis, tornadoes, fires, explosions, pandemic disease, and man-made disasters, including acts of terrorism and military actions, could adversely affect our results of operations, cash flows or financial condition. Terrorist attacks and other acts of violence or war may adversely affect the Indian securities markets. In addition, any deterioration in international relations, especially between India and its neighboring countries, may result in investor concern regarding regional stability which could adversely affect the price of the Equity Shares. In addition, India has witnessed local civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic or political events in India could have an adverse effect on our business.

Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse effect on our business and the market price of the Equity Shares.

9. *General economic conditions in India and globally could adversely affect the results of operations.*

The results of operations and financial condition of our Company depend significantly on worldwide economic conditions and the health of the Indian economy. Various factors may lead to a slowdown in the Indian or world economy which in turn may adversely impact our Company's business, financial performance and operations. Our Company mainly derives revenue from operations in India and the performance and growth of our business is significantly dependent on the performance of the Indian economy. In the past, the Indian economy has been affected by global economic uncertainties, liquidity crisis, domestic policies, global political environment, volatility in interest rates, currency exchange rates, commodity and electricity prices, volatility in inflation rates and various other factors. Accordingly, high rates of inflation in India could increase our Company's employee costs and decrease our operating margins, which could have an adverse effect on the results of operations.

Further the Indian economy is undergoing many changes and it is difficult to predict the impact of certain fundamental economic changes on our business. Conditions outside India, such as a slowdown or recession in the economic growth of other major countries, especially the United States, also have an impact on the growth of the Indian economy. Additionally, an increase in trade deficit, a downgrading in India's sovereign debt rating or a decline in India's foreign exchange reserves could negatively affect interest rates and liquidity, which could adversely affect the Indian economy and our Company's business. A slowdown in the Indian economy could adversely affect the policy of the Government of India towards the industry in which our Company operates, which may in turn, adversely affect our financial performance and ability to implement our business strategy. A loss of investor confidence in other emerging market economies or any worldwide financial instability may adversely affect the Indian economy, which could materially and adversely affect our business and the market price of the Equity Shares.

Indian Economy

Strong economic growth in the first quarter of FY23 helped India overcome the UK to become the fifth-largest economy after it recovered from the COVID-19 pandemic shock. Nominal GDP or GDP at Current Prices in the year 2023-24 is estimated at Rs. 293.90 lakh crores (US\$ 3.52 trillion), against the First Revised Estimates (FRE) of GDP for the year 2022-23 of Rs. 269.50 lakh crores (US\$ 3.23 trillion). The growth in nominal GDP during 2023-24 is estimated at 9.1% as compared to 14.2% in 2022-23. Strong domestic demand for consumption and investment, along with Government's continued emphasis on capital expenditure are seen as among the key driver of the GDP in the first half of FY24. During the period January-March 2024, India's exports stood at US\$ 119.10 billion, with Engineering Goods (25.01%), Petroleum Products (17.88%) and Organic and Inorganic Chemicals (7.65%) being the top three exported commodity. Rising employment and increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers. The contact-based services sector has demonstrated promise to boost growth by unleashing the pent-up demand. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships. India's appeal as a destination for investments has grown stronger and more sustainable because of the current period of global unpredictability and volatility, and the record amounts of money raised by India-focused funds in 2022 are evidence of investor faith in the "Invest in India" narrative.

The Indian economy was among the fastest-growing in the world before the onset of the COVID-19 pandemic. In the years leading up to the global health crisis, the country's economic indicators posted gradual improvements. The twin deficits, namely current account and fiscal deficits, narrowed, while the growth-inflation mix showed a positive and sustainable trend. Despite the geopolitical tensions worldwide, India's economy is expected to grow by 6.21 per cent in FY24, driven by robust domestic demand and strong growth in the manufacturing and services sectors. As the country progresses, demand for credit is likely to remain strong, especially among Micro, Small and Medium Enterprises (MSMEs) and retail, and is projected to grow by 13.5–14.0 per cent.

NBFCs have emerged as the crucial source of finance for a large segment of the population, including SMEs and economically unserved and underserved people. The NBFC sector in India is a vital part of the financial system, with an asset size of ₹41 lakh crore as of 2024. The industry has grown at a Compound Annual Growth Rate (CAGR) of approximately 15% over the last five years, fuelled by increasing demand for credit among

Evolution

Over the years, NBFCs have evolved given the extensive changes in the regulatory framework for NBFCs in India which have moved from simplified regulations to stringent and extensive regulations as well as toward rationalisation per the currently revised NBFC regulatory framework. Given these high levels of regulation NBFCs have also emerged as preferred options to meet credit needs since the low cost of operations has provided these NBFCs an edge over banks.

Financial Access and Supportive Government Schemes

Additionally, NBFCs have gradually become important mechanisms to fuel growth and entrepreneurship due to the launch of government-backed schemes including Pradhan Mantri Jan-Dhan Yojana which has contributed to a significant increase in the number of bank accounts.

These NBFCs have also been key in being able to mitigate and manage the spread of risks during times of financial duress and have increasingly become recognized as complementary services to banks.

NBFCs have become integral for all business services, including loans and credit facilities, retirement planning, money markets, underwriting and merger activities. As such these companies play an important role in providing credit to the unorganized sector and for small borrowers at local level. Additionally, hire purchase finance is also the largest activity of NBFCs and the rapid growth of NBFCs has gradually blurred the lines between banks and

NBFCs although commercial banks have retained importance. These NBFCs facilitate long term investment and financing, which is challenging for banking sector, and the growth of NBFCs widens range of products available for individuals/institutions with resources to invest.

As of March 31, 2024, there were 9,327 NBFCs registered with the RBI categorized as Asset Finance Companies, Loan Companies, Infrastructure Finance Companies (IFCs), Systematically Important Core Investment Company (NBFC – CIC – ND – SI), Infrastructure Debt Fund (NBFC – IDF) and Micro Finance Institutions (NBFC – MFIs).

Retail segment to support NBFCs overall credit growth

The NBFC sector has, over the years, evolved considerably in terms of size, operations, technological sophistication, and entry into newer areas of financial services and products. The number of NBFCs as well as the size of the sector have grown significantly, with a number of players with heterogeneous business models starting operations. The increasing penetration of neo-banking, digital authentication, and mobile phone usage as well as mobile internet has resulted in the modularization of financial services, particularly credit. Overall NBFC credit during FY20 to FY24, witnessed a CAGR of ~12% which was majorly led by retail segment which accounts for ~48% of overall NBFC credit and witnessed a CAGR of ~15%, while NBFC non-retail credit witnessed a growth of ~9% during the fiscals.

Going forward, growth in the NBFC retail segment is expected at 16-18% CAGR between FY24-FY26 which will support overall NBFC credit growth, with continued focus on the retail segment and multiple players announcing plans to reduce wholesale exposure, the retail segment's market share is expected to rise further to 48% by end of FY25 and remain around 48.5% in FY26.

NBFCs have a reasonable market share across segments

Under-served households and businesses represent a significant proportion of India's population that faces challenges in obtaining credit due to reasons such as a lack of credit history and the inability to provide collateral. Government initiatives such as Pradhan Mantri Jan-Dhan Yojana (PMJDY), Aadhaar, and widespread digitization (referred collectively as the 'JAM Trinity') have expanded the formal financial inclusion for underserved Indian population. Additionally, the widespread availability of affordable data and digital disruption has transformed the financing landscape in India. NBFCs have generally been able to address this opportunity on account of their strong origination skills, extensive reach, better customer service, faster processing, streamlined documentation requirements, digitization of customer on-boarding process, customized product offerings, local knowledge, and differentiated credit appraisal methodology. The rapid evolution of fintechs over the last few years has added another dimension to the market served by NBFCs and has fuelled rapid growth across the landscape.

NBFCs have consistently gained or maintained market share across most asset classes over the last few years. Though, in certain segments such as housing finance to prime customers, they have lost market share to banks due to the decline in market interest rates. In the gold loans market, NBFCs slightly lost market share in Fiscal 2022 due to increasing focus of banks (both public and private) towards gold loans as well as RBI permitting banks to offer gold loans at a higher loan-to-value amidst the COVID-19 pandemic. Nevertheless, NBFCs continue to have a healthy market share across other segments.

Impact of digitization on retail credit

Digital lending products such as instant loans or online personal loans have completely revolutionized retail credit due to great convenience that it offers to the customers. The underwriting process, while essential for assessing borrowers, can sometimes be time-consuming and reliant on subjective elements. Thus, there is room for improvement in leveraging all available data efficiently. Organizations may find opportunities to streamline the process, making it more agile and resource-effective. Lenders are increasingly using their web platforms and creating apps to register, score, approve and disburse loans to their customers. For lenders, digitization has enabled them to make informed decision making through business insight generation and data visualization. Moreover, it has improved lead generation for lenders with faster onboarding of customers, comprehensive loan servicing, and fraud detection. For customers, it has become easier to gather information about different lenders with the help of digitization and compare them. Further, online loan application has made it convenient for borrowers to fill loan applications from remote locations, calculate EMIs, check for eligibility of loan amount and provide all documents digitally which enhances customer experience throughout the process and help them make an informed decision.

Furthermore, the India Stack, a set of APIs and tools that enable the building of digital platforms for various services, has been a game-changer in the retail credit sector. The India Stack includes Aadhaar (for identity verification), e-KYC (for paperless Know Your Customer processes), eSign (for digitally signing documents), and the Unified Payments Interface (UPI) for seamless and instant fund transfers. All of these components have been seamlessly integrated into the digital lending ecosystem, making it easier for lenders to streamline their operations and offer a seamless experience to borrowers. Looking ahead, the digitization of retail credit in India is expected to continue evolving.

Opportunities

1. Expanding Market Demand:

The growing credit needs of individuals, small businesses, and rural entrepreneurs in South India present significant growth potential. Increasing awareness of financial products and rising aspirations among Tier-II and Tier-III city populations further drive demand for personal and business loans.

2. Financial Inclusion:

Opportunities exist to penetrate underserved rural and semi-urban areas, particularly in Kerala, Tamil Nadu, and Karnataka, where access to formal credit remains limited. By offering tailored products like microfinance and term loans, the company can tap into these high-potential markets.

3. Digital Transformation:

The adoption of digital lending platforms and artificial intelligence (AI)-driven credit assessment tools enables faster loan processing, improved customer experience, and better risk management. JMJ Fintech Limited's proposed investment in technology provides a competitive edge in expanding its customer base and streamlining operations.

4. Government and Regulatory Support:

Policies encouraging entrepreneurship, MSME development, and financial inclusion offer substantial opportunities for NBFCs. Initiatives such as the Credit Guarantee Fund for Micro and Small Enterprises (CGTMSE) and government incentives for startups align with the company's focus on SME and business loans.

5. Diversification of Products and Services:

Expanding the product portfolio to include gold loans and working capital finance will attract a broader customer base and reduce dependence on any single segment. This diversification will enhance the company's resilience to sector-specific risks.

6. Regional Economic Growth:

Kerala, Tamil Nadu, and Karnataka are key economic hubs with vibrant industries such as tourism, IT, manufacturing, and agriculture. Supporting these industries with customized financial solutions creates a long-term growth opportunity for JMJ Fintech Limited.

Threats

1. Regulatory Risks:

NBFCs are subject to stringent regulations from the Reserve Bank of India (RBI). Changes in policies regarding capital adequacy, provisioning for non-performing assets (NPAs), or lending norms could impact operations and profitability. Non-compliance with these regulations may lead to penalties or restrictions.

2. Intense Competition:

The company faces stiff competition from banks, fintech companies, and other NBFCs offering similar products. Competitors with lower cost structures, greater digital capabilities, or wider geographical reach may pose a challenge to market share and profitability.

3. Economic Volatility:

Economic slowdowns, inflation, or rising interest rates could affect borrowers' ability to repay loans, leading to an increase in NPAs. Unfavorable macroeconomic conditions, such as reduced consumer spending or business activity, may also dampen demand for loans.

Potential Client Concentration Risks

- **High Dependency on Retail Borrowers:**

- **Geographical Dependence:**
 - Kerala currently contribute the majority of the business, creating vulnerabilities to localized economic or regulatory disruptions.

Pricing Differentials Across Clients

JMJ Fintech Limited follows a dynamic pricing strategy, where interest rates are determined based on a combination of factors, such as the borrower's credit score, the nature of the loan, repayment history, prevailing industry standards etc. Retail borrowers seeking personal loans are typically charged higher interest rates due to the unsecured nature of these loans. These rates are calibrated to reflect the increased risk associated with such loans, particularly when collateral is not provided. Factors like a strong credit score and consistent repayment history can, however, help eligible borrowers secure comparatively lower interest rates.

For small and medium enterprises (SMEs), the pricing structure is more competitive, as these loans are often backed by collateral or supported by the borrowers' established creditworthiness. Interest rates in this segment take into account the nature of the business, industry benchmarks, and the financial health of the borrower, including prior loan repayment behavior. Borrowers with stable cash flows and strong repayment records may benefit from more favorable terms, aligning the company's pricing with market standards while managing risks effectively.

In rural and semi-urban markets, loans targeted at micro-enterprises and self-employed individuals generally carry slightly higher interest rates. This is due to the limited availability of collateral and higher credit risk associated with low-income borrowers. However, MJM Fintech Limited ensures that pricing remains flexible and tailored, supporting financial inclusion while balancing risk. By taking a holistic approach to pricing across different borrower categories, the company maintains a fair and competitive framework that aligns with both borrower needs and its risk management objectives.

3. Key Focus Areas for Risk Mitigation

1. **Diversification:** Expand product offerings and client base across industries and geographies to reduce dependency on a specific segment or region.
2. **Technology Adoption:** Leverage advanced analytics for credit risk assessments, early-warning systems, and portfolio monitoring.
3. **Strengthened Collections:** Implement proactive repayment monitoring and offer repayment assistance programs to reduce defaults.

- a) Our objectives are to obtain reasonable assurance about whether the standalone financial results as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion.
- b) Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with auditing standards will always detect a material misstatement when it exists.
- c) Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial results. As part of an audit in accordance with auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. And we also:

- Identify and assess the risks of material misstatement of the standalone financial results, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors.
- Conclude on the appropriateness of Board of Director's use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company's to cease to continue as a going concern.
- Evaluate the overall presentation, structure, and content of the standalone financial results, including the disclosures, and whether the standalone financial results represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial results that, individually or in aggregate, makes it probable that the economic decisions of the reasonable knowledgeable user of the standalone financial results may be influenced. We consider quantitative materiality and qualitative factors in

- i. planning the scope of our audit work and in evaluating the results of our work; and
- ii. to evaluate the effect of any identified misstatements in the standalone financial results.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Other Matters

The figures of the standalone financial results as reported for the quarter ended March 31, 2025 and the corresponding quarter ended in the previous year are the balancing figures between audited figures in respect of the full financial year and the published year-to-date figures up to the end of third quarter of the relevant financial year. Also, The figures up to the end of the third quarter of the current and previous financial year had only been subjected to limited review by us.

Our opinion is not modified in respect of the above matter.
